

SnowEx[®]

LEADERS IN ICE CONTROL

✓ LEADERSHIP

SnowEx was the *FIRST* to introduce low profile swing-away hoppers entirely constructed of heavy-duty polyethylene – patented. The *FIRST* to offer an auger transmission system that allows the all-electric units to spread any material – patented. And the *FIRST* to guarantee its spreaders for 2 years – standard. These are just a few of the innovations we've brought to market...and we're just getting started.

✓ EXPERIENCE

Who knows the snow and ice business better than those who are out there every morning, braving the elements? The fact is SnowEx has felt your pain. We started as a snow removal company back in the 70s. After more than 20 years of shoveling sidewalks, plowing driveways and sanding and salting parking lots, we took that wealth of experience and put it into building the most comprehensive line of innovative spreaders on the market.

✓ VERSATILITY

With more than 20 spreader models – all with several available mounts, accessories and add-ons – the comprehensive SnowEx line offers a solution for virtually any size of vehicle or any type of end-user. Whether you're a small estate owner, property manager, professional contractor or municipality, we have the spreader to match your applications.

✓ DEPENDABILITY

At SnowEx, we're committed to providing the most innovative, productive and durable spreaders on the market. The patented SnowEx polyethylene design is completely corrosion-free. Additionally, most models feature our patented auger system powered by a heavy-duty 12-volt motor transmission unit for uninterrupted, precision material flow. With no engines, pulleys, sprockets, belts or chains, SnowEx spreaders require minimal maintenance, meaning more uptime and more money in your pocket.

✓ DEALER SUPPORT

Just give SnowEx a call. It's not a machine that answers, but a real person. And it's not someone with a flowchart on his desk going through the motions to hopefully come up with a solution, but instead someone who knows your business and has actually used the equipment you're using. Through our network of more than 600 servicing dealers in North America and 15 countries worldwide, our commitment to you is solid...and it shows!

✓ EDUCATION

Our dedication to the industry doesn't end with the product. Every year we spend hundreds of hours and thousands of dollars to conduct educational seminars around the country about the business side of spreading. It's not charity...we simply understand that if you're more successful, we're more successful.

*With so much to offer, the question shouldn't be
"Why SnowEx?"*

But instead... "Why not?"
